... Continuation Sheet (PTOL-303)

Continuation of 2. NOTE: Applicants proposed amendment of claim 1 to add limitation of a fifth bacterial RT amino acid structural motif comprising Gly-Xaa8-Pro to the claimed RT polymerase would if entered after final would require additional search and additional consideration. Such consideration would likely involve a rejection under 112 first paragraph for a lack of adequate written description because the proposed amendment does not appear to have support in the specification as originally filed and would thus be consiedered new matter..

Continuation of 3. Applicant's reply has overcome the following rejection(s): Applicants reply appears to have overcome the previous rejection of claims 1, 2, 4-8 and 15-17 under 35 U.S.C. 103(a) as being unpatentable over either of Inouye et al. (US Pat. 5,320,958 or US Pat. 5.434,070), in view of the combination of Rice et al. (July 1993), Xiong et al. (1990) and Hsu et al. (Apr. 1992).

Continuation of 5. does NOT place the application in condition for allowance because: With the exception of the rejection discussed in section 3 above, the rejections of record remain based on the non-entry of applicants amendment.
